

INDUSTRY BRIEFING

GREEN MARK VERSION 4.0 FOR NEW BUILDINGS

// BRIEFING OBJECTIVE

BCA announced on 5 Aug 2010 that a more stringent Green Mark standard (Green Mark Version 4.0) will be implemented with effect from Dec 2010. The move will raise the standards of 'green' buildings in Singapore and guide the industry towards more sustainable and energy efficient practices in building design, construction and maintenance. The introduction of Green Mark Version 4.0 is one of the steps towards fulfilling the Government's goal in "greening" 80% of its buildings by 2030.

// WHO SHOULD ATTEND

Developers, Architects, Mechanical & Electrical Engineers, Environmental Engineers, Facilities Managers, Government agencies and other decision makers who are involved in building design, construction and maintenance.

// BRIEFING PROGRAMME

- Overview of BCA Green Building Initiatives and Implementation Timeline of Green Mark Version 4.0
- Key changes to Green Mark Version 4.0 Residential Criteria
- Key changes to Green Mark Version 4.0 Non-Residential Criteria
- Question and Answer Session

// ACCREDITED BY

- The Professional Engineers Board (PEB)
- The Singapore Institute of Architects (BOA- SIA) – Pending confirmation
